21.02.2012-01

- Read these instructions carefully before installing your equipment.
- Install the mount in a suitable location using fixings which are appropriate for the ceiling material and structure (these are not included).
- Consult a qualified builder if you are in any doubt as to the structural integrity of the ceiling.
- Do not attempt to alter or modify any part of the projector mount or its attachments.
- Do not use if any parts are broken or appear to be damaged.
- Tighten all bolts and fixings securely. Only use fixings provided with this bracket.
- Do not mount your projector near to sources of heat or moisture.
- Always have a minimum of two persons to install the projector and the mount.

**Mount Bracket To Projector**

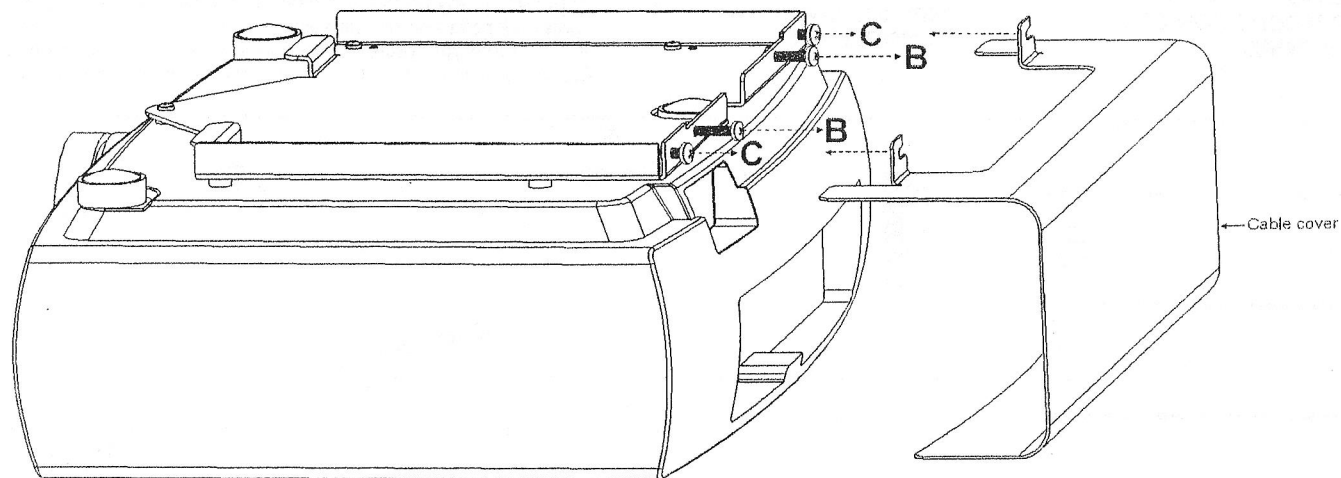

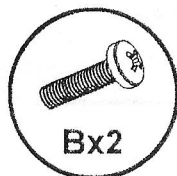

# 3

## Preparation to attach to ceiling plate & attaching cable cover to projector

Using a pozi-drive screw driver, unwind 2x screws **B** so that 10mm of thread is visible

Unwind 2x screws **C** so that 3mm of thread is visible. This will allow you to insert or remove the cable cover.  
Tighten screws **C** when cable cover is in position to secure.

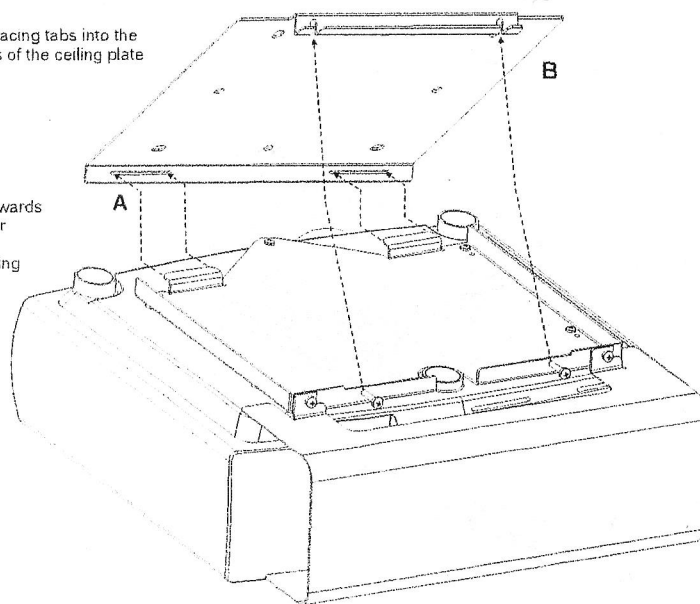

# 4

## Attach Projector to ceiling mount

**A**  
Insert the forward facing tabs into the front mounted slots of the ceiling plate

**B**  
Move the back of the projector upwards placing screws **B** between the rear facing slots on the ceiling plate.  
Hold the projector in position moving on to stage 5

# 5

## Secure projector mount together

Fully insert and tighten **B** (M5 x 25mm machine screws)
